Date:	Thursday 23 November 2017
Timings:	Registration from: 10:30 start time: 11:00 end time (approx.): 17:00
Price:	Members £175, non-members £280
Format:	Interactive session that involves all participants – please bring a smartphone and/or tablet with you to this session

Why attend this training day?

Mobile learning (mLearning) is increasingly used in language teaching. But what exactly is it? Although often associated with 'learning on the move' and mobile 'apps', mLearning is a lot more than that. This workshop provides an overview of this popular field, and we examine the principles behind it to assess to what extent you can integrate the use of mobile devices into your own face-to-face teaching. You will leave this workshop with an understanding of what mLearning entails as well as the challenges involved; activities with mobile devices to try out; and a clear idea of how to start to integrate mobile learning into your own teaching context.

Learning outcomes

Delegates will leave the session with:

- a clear understanding of the principles behind mobile learning
- a set of practical teaching activities using mobile devices
- a collection of pedagogically-sound apps to try out
- their own mobile activity, developed in-session

Who is this session for?

Both experienced and inexperienced teachers, academic managers and directors of studies.

About the trainer

Gavin Dudeney is Director of Technology for The Consultants-E and a NILE MA Tutor. Author of *The Internet & The Language Classroom* (CUP 2000, 2007) and co-author of the award-winning publications *How To Teach English with Technology* (Pearson 2007) and *Digital Literacies* (Routledge 2013), his most recent book, *Going Mobile*, was published by DELTA Publishing in 2014.
